REMOTE AND VIRTUAL

LEARNING WITHOUT LIMITS

Remote and Virtual Tech School programs in Victoria provide digital STEAM programs to Secondary students, often through initiatives like the Tech Schools Network and Virtual School Victoria (VSV).

Banyule Nillumbik Tech School supports non-partner schools across the state. Our programs can involve items from our Loan Library or virtual courses accessed via our LMS.

The remote and virtual program supports students to engage in authentic STEAM problem-solving, design challenges and team projects, developing creativity, adaptability and digital fluency in a professional online setting.

Learning Experiences on offer

Designing Thinking 101

- **Learn to think like a designer,** to empathise, collaborate and be boldly creative.
- **Apply Design Thinking** to real world problems.

App Design

- **Students venture beyond** consumption of apps to designing apps fit for purpose.
- **Create**, **test** and **refine** iterations using a people-centred approach.

Loan Library

- **Access STEAM technology** to enhance the learning experiences at your school.
