

TECH TASTER MEDIA

CREATE IMPACTFUL CONTENT

In a world saturated with information, the ability to tell a clear, authentic story has never been more important.

This learning experience equips students with the tools of modern media production: from using easy-to-operate handheld cameras and microphones, to planning, scripting, recording, editing and presenting.

Students experiment with producing audio and video media content, gaining both technical expertise and creative confidence. By creating media that reflects their own perspectives and values, they learn to think critically, collaborate effectively, and communicate with impact; skills that are essential skills across every industry.

Student Outcomes

Engage Session

- **Explore** key stages of media production, including scripting, recording and editing.
- **Understand** ethical and legal considerations in media creation.

Create Session

- **Plan, record, and edit** a short video.
- **Publish or present** a finished piece of media that showcases their acting and ideas.

What do students and teachers say about BNTS programs?

"We had so much fun with the equipment. It was easy to use, and what we filmed looked great."

Student, Diamond Valley College

"We've got to try and create content just like the videos we had been watching on YouTube!"

Student, Ivanhoe Girls Grammar School

"I am interested in my students participating in further Tech School programs because they provide valuable hands-on learning experiences that build their skills, confidence, and interest in future pathways."

Teacher, Diamond Valley College

Looking for an option to *deepen the impact* for your students?

This program can run across **two days**, allowing for extended projects, collaboration, and reflection. **Contact our team** to design a **two-day visit** tailored to your learners.
