

TECH TASTER

PODCASTING AND LIVE RADIO

CRAFT YOUR STORY AND AMPLIFY YOUR VOICE

Watch your students become digital storytellers as this program guides students through planning, recording, editing and producing a podcast in a state-of-the-art studio.

Podcasting offers students a creative platform to share ideas, build communication skills and gain confidence in media production.

Students are encouraged to explore contemporary issues, giving them a voice to communicate ideas and opinions relevant to them through a contemporary digital medium.

Student Outcomes

Engage Session

- **Discover** how media laws and guidelines apply to podcast content.
- **Identify** steps in podcast creation.
- **Explore** podcasting and live radio as media and what makes it popular.
- **Plan, record & review** a podcast or live show.

Create Session

- **Assess** podcast for clarity, structure and flow.
- **Edit** audio in Audacity
- **Publish** a unique expression of your students' perspective.

What do students and teachers say about BNTS programs?

"When I heard my voice edited with music, I realised I have something worth sharing."

Student, Eltham College

"We debated, laughed, and then recorded. It felt like our own radio show."

Student, Parade College, Bundoora

"Students really stepped into different perspectives. It changed their interviews from 'asking questions' to telling stories that mattered."

Teacher, Overnewton Anglican Community College

Looking for an option to *deepen the impact* for your students?

This program can run across **two days**, allowing for extended projects, collaboration, and reflection. **Contact our team** to design a **two-day visit** tailored to your learners.
