TEACHER PD

EMPOWER YOUR TEACHING.
INSPIRE YOUR STUDENTS.

Join us for hands-on professional learning designed to build confidence integrating **STEAM**, **Design Thinking**, and **Digital Technologies** into your classroom.

Whether you're new to tech or looking to extend your practice, our workshops offer **practical**, **curriculum-aligned** experiences using the latest tools — from Design Thinking to 2D and 3D Design.

Teacher Professional Development builds **skills**, **knowledge** and **confidence** in STEAM, which is vital to create capability in teachers to support learning experiences that prepare students for the future.

Work with experienced educators to **co-design** and **enhance** your teaching toolkit and create more **engaging** programs for your students.

Learning Experiences may include

- Film editing with Adobe After Effects & Premiere
- Operating a DSLR camera to film or photograph
- Animation with Adobe Animate
- Intro to programming & basic game making with Adobe Animate & JavaScript
- Electronics & soldering with Arduinos
- Crime scene making with Thinglink
- Podcast creation
- 3D printing & 3D design with Fusion
- Lasercutting
- App design with Figma
- Sublimation printing
- Merchandise creation with DTF and DTG printers
- Jewellery creation
- Digital design with Adobe Illustrator & sticker printer
